# RepSec™ Licensing Framework v1.0

Patent Holder:
Ralph Ehlers (Marbella, Spain)
Patent pending: RepSec Protocol with Non-Reusable Data Protection (US & EU filings)

Covered Technologies:
- RepSec Core Protocol (draft-ehlers-repsec-01)
- RepSec Non-Reusable Data Extension (NRU) (draft-ehlers-repsec-nru-00)

## 1. Licensing Availability

The RepSec protocol and extensions are made available under Reasonable and Non-Discriminatory (RAND) licensing terms, consistent with IETF IPR policy (RFC8179).

Licenses are required for any implementation of RepSec/NRU that would otherwise infringe the patent claims.

## 2. License Models

| | |
|---|---|
| Organizational License (Flat Annual Fee) | Startups: from €25,000/year. Large enterprises: €50,000–€100,000/year. |
| Usage-Based License (Integration Fee) | €1–2 per protected user/month (ideal for SaaS, telcos, cloud services). |
| Field-of-Use Licensing | Exclusive licensing available by sector. Privacy & Reputation Management sector ex |

## 3. RAND Commitment

Licenses will be offered on terms that are reasonable, non-discriminatory, and transparent.

- Patent Holder may negotiate royalties proportionate to commercial benefit and scale.
- Non-profit research and academic pilots may qualify for no-fee evaluation licenses.

## 4. Licensing Process

1. Expression of interest via licensing@repsec.org
2. Execution of license agreement (short-form)
3. Implementation rights granted for covered technologies.

## Statement of Intent:

RepSec™ is designed as an open standard with strong intellectual property protection. This licensing framework ensures broad adoption while sustaining innovation and compliance.
